Hydrant Flushing

Greenville Water Department personnel will begin flushing the City Fire Hydrants. The flushing program is intended to remove any deposits built up on the inside of the water mains. This could cause the water to become discolored for a short period of time. This discoloration is from mineral deposits, and not harmful to public health. If you notice discoloration let the water run for 5 – 10 minutes and the discoloration should be gone.

The flushing will start on Sunday September 20th between the hours of 10 pm and 6 am and will continue each day until the entire water system is flushed. This should take approximately 3 weeks. If you have any questions regarding our flushing operation, please contact the Public Services Department at (616) 754-5098. Thank you for your understanding during this maintenance operation.

The mission of the City of Greenville, as a part of the Coalition of Greater Greenville, is to serve through leadership and action, to assure all citizens a collaborative, planned and visionary community.
